This technical document has been prepared to support regulatory permitting and approvals for the Cinder Lake Landfill (CLL). CLL, located northeast of Flagstaff, Arizona, is a 175-acre municipal solid waste facility that has been in operation since the mid-1960s. The proposed lateral expansions will increase the landfill to approximately 343.9 acres.

This document is intended to serve the following purposes:

- Provide the information for approval by the Arizona Department of Environmental Quality.
- Demonstrate that the existing landfill and proposed lateral expansion comply with the location restrictions, operating and design criteria, and groundwater monitoring, closure, and post-closure care requirements specified in 40 Code of Federal Regulations (CFR) § 258.
- Provide a consolidated operational tool to be used by the City of Flagstaff for the continued operations of the landfill.

1.1 SIGNATURES AND CERTIFICATIONS

To the best of my knowledge, the information submitted in this application is true and accurate.

To the best of my knowledge and belief, the City of Flagstaff is in compliance with all other applicable local restrictions and ordinances relative to the construction and operation of CLL and the proposed lateral expansion.

The City of Flagstaff has not been subject in any civil proceeding to an injunction, decree or judgment or permanent order of any state or federal court within the previous five years relating to solid waste, special waste, hazardous waste, used oil or used oil fuel, petroleum, water quality or air quality. Therefore, in accordance with A.R.S. §49-109, a certificate of disclosure is not required.
